LANDSCAPE **Hatch Pattern Library**

# Download the Hatch Pattern Library

The hatch pattern library thumbnails displayed in this guide will help you to select the proper pattern file while using a CAD software or any other compatible software. The hatch pattern library is classified by product alphabetical order. Don't forget to download the library from the Permacon Resources web page.

The hatch pattern file names are divided into 5 parts separated by a character (\_). The name is followed by a letter indicating whether it is a paver (P) or a slab (S). Then, one or more letters indicate the presence of pavers or slabs of different sizes (eg, ABC). The last code identifies the pattern with a letter and a number. Finally, when you download the hatch pattern library, you will notice that IMP/MET has been added at the very end of the file name. This indicates whether the hatch is in imperial or metric.

For questions about this guide or for more information, please contact your Permacon representative.

**To get the best quality in the rendering,** Permacon recommends adjusting the origin point of the Virage paver hatching pattern in AutoCAD:

- Click on *Set Origin* in the *Hatch Editor* upper menu
- Choose the first option (*origin point* in the lower left)
